

DAS is an independent provider of advisory and programme delivery services to the defence market. We support enterprise-level planning through to the delivery of individual acquisition and sustainment programmes, helping to ensure that the armed forces are equipped with the right capabilities, within the right timescales and at the right price.

Advisory services:

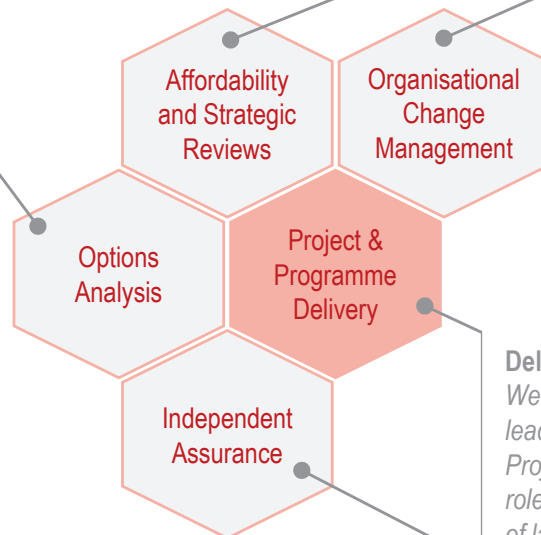

We review current and future defence expenditure plans at a project, command and enterprise level to identify and manage potential affordability constraints arising from a range of internal and external factors. We are experienced in the establishment of comprehensive whole-life costs alongside macro-economic modelling to support scenario planning by defence budget holders. Our portfolio planning toolsets enable a top-down re-profiling of commitments to ensure that future plans are optimised to strategic or budgetary objectives

Advisory services:

We help our clients to create high performing teams. Our consultants evaluate team structures and performance against existing or future policies, identify international / multi-sector benchmarks and lessons learnt. We establish organisational design criteria, create holistic route-maps that consider both the soft and hard levers for change, and we help our clients to implement these change programmes

Advisory services:

We undertake cost-benefit studies for defence acquisition programmes to establish the optimum value for money solutions. We employ a range of decision science toolsets (such as multi-criteria portfolio analysis, MCPA) to identify and compare capability trade-offs

Delivery services:

We provide embedded resource to act in both leadership and support roles within Integrated Project Teams, typically in 'Customer Friend' roles, enabling the effective and efficient delivery of large and complex projects. Our consultants have many years' experience in a diverse range of disciplines, including:

- Project / Programme Management
- Acquisition Strategy
- PMO Set-up and Operation
- Systems and Safety Engineering

Advisory services:

We conduct independent assurance reviews of defence capability programmes on behalf of project executives or external audit bodies. These reviews are conducted either on a generic / holistic basis using a structured and systematic toolkit or on a more focussed basis, such as cost or risk assurance reviews

Our clients include:
