Competitive Discriminators

- Manufacturing systems and processes developed over more than 30 years provides customers confidence of reliability, repeatability and security of information.
 - Flexible operations respond to customer demands in compressed timescales without compromise.
 - Fully integrated ERP system (SAP) controls all operations to ensure rigid compliance and traceability to specification.
 - In-house production test development provides customers robust and low cost production test solutions. Typically 30%-40% lower cost than a dedicated test house.
 - Delivery in Full on Time (DiFoT) 100% for Automotive customer.
 - Modern and comprehensive manufacturing equipment enables designers to select the highest technology electronic components and high reliability manufacture of electronic products.
 - Ongoing investment in automated processes mitigate human error.
- Highest Supplier Scorecard result for: Quality, Delivery, Productivity and Competiveness from multinational customer.

Customers

Experienced gained from working with demanding OEM customers from broad market segments including:

- Defence: Primes and Sub-contractors:
 - Thales (SEA),
 - Boeing Defence Australia. (LAND)
 - BAE Systems (LAND)
 - Thomas Global Systems (AIR),
 - MAS Zengrange (LAND & SEA).
 - Curtiss Wright (LAND)
- Aerospace
- Medical
- Automotive
- Industrial Controls
- Telecommunications
